

RONDO sealing collar

The **RONDO Sealing Collar** reliably seals ducts and pipes with smooth surfaces. The openings in concrete floor slabs, walls and shafts are securely sealed against groundwater and pressurised water.

RONDO sealing collars

Technical specifications:

Article number:	090890 to 090954
Colour:	Green (DN 10 – DN 400) Black (DN 450 – DN 1200)
Material:	Green: TPE Black: EPDM
Density:	Green: approx. 1.17 kg/dm ³ Black: approx. 1.45 kg/dm ³
Hardness:	Approx. 55 ± 5 Shore A
Tensile strength:	Approx. 6.5 N/mm ²
Elongation at break:	Approx. 380%
Weight:	0.13 kg – 5.75 kg
Service temperature range:	Approx. -30°C up to +70°C

Test certificate / approvals:

Test report
MFPA Leipzig
No.: PB 5.1 / 13-164

Slurry/liquid manure/silage effluent test
(RO 10 – RO 400)
MPA Braunschweig
(1200/442/15e) – Pan of 28.10.2015

Alkali resistance (RO 10 – RO 400)
MPA Braunschweig
(1200/642/15b) – Pan of 26.01.2016

Pressure water-tightness:

5 bar (green)
4 bar (black)

Resistances:

e.g.
Diluted acids (green/black)
Diluted alkalis (green/black)
Liquid manure/slurry (green/black)
Fermentation mash (green/black)
Oil and bitumen (green)
Radon (green)
Methane gas (green)
Ozone (green)
Liquids aggressive to concrete (green)

Further resistances are available on request

Packing unit:

Available singly

Additional packing units:

RO 110 50 pcs./carton
RO 125 40 pcs./carton
RO 160 35 pcs./carton
RO 200 30 pcs./carton

Storage:

Store in a dry place and out of direct sunlight

Disposal:

Can be disposed of at municipal waste landfill sites, taking into account the local waste disposal regulations.

Application:

The **RONDO sealing collar** is suitable for routing pipes through concrete slabs, walls and shafts so that they are pressure water-tight.

It prevents moisture from penetrating the structure along the pipe's outer wall.

The **RONDO sealing collar** can be installed on all smooth-walled pipes.

Installation:

Also see our installation video at www.mastertec.eu

YouTube

Installation-
video

The **RONDO sealing collar** is supplied ready-to-install with two (green) or three (black) stainless-steel clamping straps for fixing.

Soiled pipes must be cleaned prior to installation.

Soiled pipe walls must be cleaned prior to attaching the **RONDO sealing collar**.

The **RONDO sealing collar** is even easier to install if placed in hot water beforehand (10 minutes).

Push the **RONDO sealing collar** onto the end of the pipe and slide along before the pipe is installed.

The **RONDO sealing collar** should be mounted centrally on the wall/floor plate.

Always ensure a minimum concrete covering of 5 cm. The distance to the surrounding reinforcement or other components must be at least 3 cm.

Use a screwdriver to tighten the clamping straps sufficiently to prevent the **RONDO sealing collar** from shifting during concreting.

During concreting, ensure thorough sealing around the **RONDO sealing collar** in order to prevent defects/rock pockets.

Safety:

The **RONDO sealing collar** does not contain any hazardous substances and poses no problems whatsoever in terms of handling and application. To the best of our knowledge, it contains no substances that are harmful to groundwater or could trigger health problems or allergic reactions in the installer.

Nonetheless, we recommend that an appropriate level of hygiene is observed during application and that hands are washed as a basic rule before meals.

Basic principles:

All dimensions and information in this data sheet reflect the results of the laboratory tests that have been carried out.

Deviations from the values determined by us under laboratory conditions are possible due to environmental and operating conditions beyond our control.

The data in this data sheet only applies for the product delivered by us.

The product data corresponds only to the specifications in Germany. Possible country-specific deviations are not taken into account here.

Disclaimer:

The technical information reflects our current knowledge of the RONDO sealing collar. It is intended only as information for users. As we do not know the envisaged applications and installation conditions, it is the responsibility of the user to carefully check that the product is fit for purpose. Due to the different components at the installation site and the in-situ working conditions, MASTERTEC cannot provide any guarantee whatsoever for the result of the work. Claims arising from any legal relationship can only be recognised in the event of wilful intent or gross negligence, irrespective of the statements made here or advice provided verbally. In this case the user must prove that he has provided MASTERTEC in writing with all the information required to correctly assess the installation situation in good time. Subject to necessary product specifications or further developments. By providing this information MASTERTEC does not intend to infringe third-party rights. The latest data sheet in each case applies. Our corresponding terms and conditions of sale and delivery apply.
